

Apple Server Hardware

Welcome to VCFSocal 2026!!

The Xserve/Xserve RAID:

This collection of early 2000's Apple hardware is highlighted by the Xserve and Xserve RAID. One half of the RAID is attached to the G4 Xserve, while the other half serves the G5 PowerMac

The G5 is running Final Cut Pro, with all video stored on the RAID. It also has Logic Express running on it, in addition to some early 2000's games and emulators.

The other machines are networked to the Xserve, and can play music or videos, stored on the Xserve RAID. Check out the games here as well!

Things to do:

Watch a movie!

- [Who Framed Roger Rabbit?](#)
- [Tron](#)
- [At the Circus](#)

Watch a cartoon!

- [The Shooting of Dan McGoo-1945](#)
- [Bad Luck Blackie-1949](#)
- [Magical Maestro-1952](#)

Note: These cartoons are from the 1940's and 1950's and may contain ethnic and racial prejudices that were commonplace at that time.

These prejudices were wrong then, and are wrong today. They have not been edited, and are presented as they were created, because to do otherwise would be the same as claiming these prejudices never existed.

Listen to some music!

- [Click here to listen.](#)

Everything is coming off of the G4 Xserve and Xserve RAID!

The Machines:

- [Xserve/Xserve RAID](#)
 - [G5 PowerMac 7,3](#)
 - [G4 iMac 4,2](#)
 - [G4 PowerBook 5,3](#)
 - [G4 'Graphite'](#)
 - [G3 'Pismo' PowerBook](#)
 - [Xeon MacPro 1,1](#)
